ø16 H6 Series Miniature Switches & Pilot Lights

Designed to ensure ease of operation and safety
Ideal for heavy duty applications such as machine tools

- Removable contact block makes installation and removal easy.
- Large operators; bezel size (ø24 mm, 24×24 mm)
- High operating force and long stroke prevent inadvertent operation.
- Contact blocks can be removed when units are mounted collectively.
- Shock- and vibration-resistant rugged design
- UL recognized, CSA certified
- EN compliant (EN 60947-1, EN 60947-5-1, TÜV approved)

- See website for details on approvals and standards.

Contact Ratings

Gold Contact

Rated Insulation Voltage	250V	
Rated Thermal Current	3A	
Rated Operating Voltage	125V AC	30V DC
Rated Operating Current (resistive load)	0.1A	0.1A
Contact Material	Gold plated silver	

Minimum applicable load (reference value): 5V AC/DC, 1 mA
(Applicable range is subject to the operating condition and load.)

Silver Contact

Rated Insulation Voltage			250V		
Rated Thermal Current			5A		
Rated Operating Voltage			30V	125V	250V
Rated Operating Current	AC 50/60 Hz	Resistive Load	—	3A	2A
		Inductive Load	—	2A	1.5A
	DC	Resistive Load	2A	0.4A	—
		Inductive Load	1A	0.2A	—
Contact Material			Silver		

AC inductive load: PF = 0.6 to 0.7, DC inductive load: L/R = 7 ms maximum

Built-in LED Lamp Ratings

Rated Voltage		5V DC	6V AC/DC		12V AC/DC		24V AC/DC	
Operating Voltage		5V DC ±5%	6V AC/DC ±10%		12V AC/DC ±10%		24V AC/DC ±10%	
Part No.		LFTD-5②	LFTD-6②		LFTD-1②		LFTD-2②	
Lamp Base		SX6S/8×5.4						
Current Draw		A, G, PW, R	S	A, R	G, PW	S	A, G, PW, R	S	A, G, PW, R	S
	DC	8mA	7mA	7mA	7mA	6mA	8mA	7mA	8mA	7mA
	AC	—	9mA	10mA	9mA	9mA	8mA	9mA	8mA
Lamp Base Color		Same as illumination color (PW: gray)						
Voltage Marking		Die stamped on the lamp base						
Life (reference value)		Approx. 50,000 hours (When used on complete DC at 25°C, luminance reduces to 50% of the initial intensity.)						

	LFTD-5	LFTD-6/LFTD-1/LFTD-2
Internal Circuit	(+) ─ ▷|─▷|─ (–)	X₁ ... X₂ ... LED Chip, Protection Diode, Zener Diode, Resistor

- Specify a color code in place of ② in the Part No.
  A (amber), G (green), PW (pure white), R (red), S (blue)
- Use a PW (pure white) LED lamp for yellow illumination.

Specifications

Operating Temperature	–25 to +55°C (no freezing)	
Storage Temperature	–30 to +80°C	
Operating Humidity	45 to 85% RH (no condensation)	
Contact Resistance	50 mΩ maximum (initial value)	
Insulation Resistance	100 MΩ minimum (500V DC megger)	
Dielectric Strength	Switch Unit	Between live part and ground: 2,500V, 1 minute Between terminals of different poles: 2,500V, 1 minute Between terminals of the same pole: 1,000V, 1 minute
	Illumination Unit	Between live part and ground: 2,500V, 1 minute
Vibration Resistance	Operating extremes: 5 to 55 Hz, amplitude 0.5 mm	
Shock Resistance	Operating extremes: 100 m/s² (10G) Damage limits: 1,000 m/s² (100G)	
Mechanical Durability (minimum operations)	Momentary: 1,000,000 Maintained: 200,000 Selector switch: 250,000 Key selector switch: 250,000 Illuminated selector switch: 250,000 Selector pushbutton: 250,000	

Electrical Durability (minimum operations)	Momentary: 100,000
	              (at 1,800 operations/hour)
	Maintained: 100,000
	              (at 1,200 operations/hour)
	Selector switch: 100,000	

Degree of Protection	IP65 (IEC 60529)	
Terminal Style	Solder/tab terminal #110 PC board terminal	
Weight (approx.)	HA1L-M1C24: 18g HA1P-1C04: 17g HA1P-14: 13g HA1B-M1C2: 16g HA1S-2C2: 18g HA1K-2C2A: 33g HA1F-2C24: 20g

Safety Precautions

- Turn off the power to H6 series before installation, removal, wiring, maintenance, and inspection of the units. Failure to turn power off may cause electrical shocks or fire hazard.
- To avoid burning your hand, use the lamp holder tool when replacing lamps.

- For wiring, use wires of a proper gauge to meet voltage and current requirements. Improper soldering may cause overheating and create a fire hazard.

Instructions

Replacement of Lens and Marking Plate

Removing the Lens
Removing the Marking Plate

Remove the marking plate by pushing the lens from the rear to disengage the latches between the lens and the lens holder, using the screwdriver as shown below.

Note: The translucent filter in the lens holder cannot be removed because this filter is sealed to make the unit waterproof.

Installing

For round lens types, place the marking plate on the lens holder with the projection engaged and press the lens onto the lens holder to engage the latches. For square lens types, insert the marking plate into the lens, and press the lens onto the holder to engage the latches.
Note: Make sure of correct orientation of the marking plate.

[Round Lens Type]   [Square Lens Type]

Lens   Marking Plate   Lens Holder   Lens   Marking Plate   Lens Holder
Replacement of Lamps

Lamps can be replaced using the lamp holder tool (OR-44) from the front of the panel, or by removing the contact block from the operator.

Removing the Lamp

1. Slip the lamp holder tool onto the lamp head. Then push slightly, and turn the lamp holder tool counterclockwise.

2. Push the bulb, and remove from the rear of the lamp holder.

Installing the Lamp

1. Insert the lamp into the lamp holder from the rear, and push in completely using the smaller end of the lamp holder tool.

Smaller end
LED lamp
OR-44
Lamp Holder
2. Hold the bulb with the lamp holder tool as shown below.

Smaller end
3. Place the insertion guide of the lamp holder and the TOP marking side or the groove in the operator unit in the same direction. Insert the lamp holder into the housing with the lamp holder tool. Then push the lamp lightly and turn it clockwise to install.

TOP marking
Plastic Part
Grooves of operating axis
(one each on top and bottom)
Panel Mounting

Remove the contact block from the operator. Insert the operator into the panel cut-out from the front, then install the contact block to the operator.

Removing the Contact Block

Turn the locking lever on the contact block in the direction opposite to the arrow on the housing. Then the contact block can be removed.
Installing the Contact Block

Insert the contact block with the TOP markings on the contact block and the operator placed in the same direction. Then lock the units, turning the locking lever in the direction of the arrow.

Notes for Mounting

Use the optional Ring Wrench (MT-001) to mount the operator onto a panel. Tightening torque should not exceed 0.88 N·m. Do not use pliers. Do not tighten with excessive force, otherwise the locking ring will be damaged.

Collective Mounting

As the locking lever can be turned easily from the rear of the units using a screwdriver, the contact blocks can be removed even when mounted collectively.

9.3
Instructions

Marking Plates and Films

For H6 series illuminated pushbuttons and pilot lights, legends and symbols can be engraved on marking plates, or printed mylar film can be inserted under the lens for labelling purposes.

Marking Plate and Marking Film Size

Lens	Round Lens (round, round w/square bezel)	Square Lens
Built-in Marking Plate	ø16.8 mm / 16.4 mm / 0.85 mm — Engraving Area	□16.4 mm / 0.85 mm — Engraving Area
	• Engraving must be made on the engraving area within 0.5mm deep. • The marking plate is made of white acrylic resin.	
Applicable Marking Film	ø18.4 mm / 16.4 mm	□18.4 mm
	• Two 0.1mm-thick films or one 0.2mm-thick film can be installed in the lens. • Marking film is not included. • Recommended marking film: Polyester film	

Insertion Order of Marking Plate and Film

[Round Lens Type]

TOP marking

Lens — Film — Marking Plate — Lens Holder — Switch

Note: Film is not supplied.

[Square Lens Type]

TOP marking

Lens — Film — Marking Plate — Lens Holder — Switch

Note: Film is not supplied. Make sure of correct orientation of the marking plate.

Wiring

1. Solder the terminals at 350°C within 3 seconds using a 60W soldering iron. Sn-Ag-Cu type is recommended when using lead-free solder. When soldering, do not touch the H6 with the soldering iron. Also ensure that no tensile force is applied to the terminal. Do not bend the terminal or apply excessive force to the terminal.
2. Use non-corrosive liquid flux.

Notes on Terminal Cover

Insert the terminal cover into the contact block with the TOP markings on the contact block and the terminal cover in the same direction.

Note: When wiring, insert the lead wires into the terminal cover holes before soldering.

TOP Marking Side — TOP Marking Side

Terminal Cover

Connection

Positive-lock connector and easy-lock connector are applicable to tab terminals.

Recommended Connectors

Item	Positive-lock Connector (Tyco Electronics)		Easy-lock Connector (Nichifu Co., Ltd.)

	0.2 to 1.25 mm²	174778-1	0.5 to 1.25 mm²	OSS-62815F3
Housing	174779-1		NET1-28-1P	

Note: Positive-lock is a registered trademark of Tyco Electronics.

Single Board Mounting

12 Units
8 Units

Mounting the PC board terminal type units on a PC board offers the following features.

Features

• Reduced installation labor, easy wiring, space saving, and standardization.
• Since the contact blocks on the PC board can be removed easily using a locking lever, the H6 series is easy to maintain.
• Because the H6 series requires no studs for fastening the unit to a PC board, special preparation of the control panel is not needed.

Notes for Designing PC board and Circuit

• Use 1.6-mm-thick glass epoxy PC board with drilled holes.
• Design a circuit so that the H6 series can operate within the rated voltage and current range. Make sure that inrush current and voltage do not exceed the rating.
• Minimum applicable load is 5V AC/DC,1 mA on gold contacts. Applicable range is subject to the operating condition and load.
• Since the 2.8-mm-wide terminal touches the PC board as shown on the right, short circuit may occur with pattern lines. Design a circuit carefully to prevent short circuit.

IDEC
PC Board Drilling Layout
Note 1: When designing, note the alignment of centerlines of the contact blocks and centerlines of the operators.

Note 2: The diameter of the terminal hole is 1.2 mm.

Installation and Removal of Contact Blocks

Turn the locking lever to install and remove the contact block on the PC board by using a screwdriver from a hole (ø6 mm) of the PC board.

ø6-mm-hole for installation and removal

Hole diameter may vary to meet installation requirements. When the locking lever can be turned by using a screwdriver from the upper or right space, the holes are not necessary.

<Example>

Upper Space

Right Space
Mounting Holes and Assembly Procedure

• Drill mounting holes in the panel as shown below. When the units are mounted collectively, provide adequate clearance.

$ø16.0^{+0.1}_{0}$

24 min.

24 min.
(ø30 mushroom: 35mm minimum)

$ø16.0^{+0.1}_{0}$

$14.8^{\pm0.05}$

$1.9^{\pm0.05}$

(panel cut-out for positioning)

• Assembly Procedure

1. Install the operator to the operation panel.
2. Insert the contact block to the operator from the rear.
3. Turn the lock lever to lock the contact block.
4. Insert the PC board to terminals and solder.

Note 1: Make sure that each terminal is inserted into the PC board correctly.

Note 2: Do not apply tensile force to the connector cable for extended period of time.

Note 3: Do not expose the contact block to water.

Note 4: Ensure to lock contact blocks when the contact blocks are installed on the operators.

Switchguard for Single Board Mounting

Part No. **HA9Z-KW1**

See page 22 for dimensions.

Note: H6 series with or without switchguard can be used on a single board, as the depth behind the panel to the PC board is the same.

Ordering Terms and Conditions

Thank you for using IDEC Products.

By purchasing products listed in our catalogs, datasheets, and the like (hereinafter referred to as "Catalogs") you agree to be bound by these terms and conditions. Please read and agree to the terms and conditions before placing your order.

1. Notes on contents of Catalogs

(1) Rated values, performance values, and specification values of IDEC products listed in this Catalog are values acquired under respective conditions in independent testing, and do not guarantee values gained in combined conditions.
Also, durability varies depending on the usage environment and usage conditions.

(2) Reference data and reference values listed in Catalogs are for reference purposes only, and do not guarantee that the product will always operate appropriately in that range.

(3) The specifications / appearance and accessories of IDEC products listed in Catalogs are subject to change or termination of sales without notice, for improvement or other reasons.

(4) The content of Catalogs is subject to change without notice.

2. Note on applications

(1) If using IDEC products in combination with other products, confirm the applicable laws / regulations and standards.
Also, confirm that IDEC products are compatible with your systems, machines, devices, and the like by using under the actual conditions. IDEC shall bear no liability whatsoever regarding the compatibility with IDEC products.

(2) The usage examples and application examples listed in Catalogs are for reference purposes only. Therefore, when introducing a product, confirm the performance and safety of the instruments, devices, and the like before use. Furthermore, regarding these examples, IDEC does not grant license to use IDEC products to you, and IDEC offers no warranties regarding the ownership of intellectual property rights or non-infringement upon the intellectual property rights of third parties.

(3) When using IDEC products, be cautious when implementing the following.
i. Use of IDEC products with sufficient allowance for rating and performance
ii. Safety design, including redundant design and malfunction prevention design that prevents other danger and damage even in the event that an IDEC product fails
iii. Wiring and installation that ensures the IDEC product used in your system, machine, device, or the like can perform and function according to its specifications

(4) Continuing to use an IDEC product even after the performance has deteriorated can result in abnormal heat, smoke, fires, and the like due to insulation deterioration or the like. Perform periodic maintenance for IDEC products and the systems, machines, devices, and the like in which they are used.

(5) IDEC products are developed and manufactured as general-purpose products for general industrial products. They are not intended for use in the following applications, and in the event that you use an IDEC product for these applications, unless otherwise agreed upon between you and IDEC, IDEC shall provide no guarantees whatsoever regarding IDEC products.
i. Use in applications that require a high degree of safety, including nuclear power control equipment, transportation equipment (railroads / airplanes / ships / vehicles / vehicle instruments, etc.), equipment for use in outer space, elevating equipment, medical instruments, safety devices, or any other equipment, instruments, or the like that could endanger life or human health
ii. Use in applications that require a high degree of reliability, such as provision systems for gas / waterworks / electricity, etc., systems that operate continuously for 24 hours, and settlement systems
iii. Use in applications where the product may be handled or used deviating from the specifications or conditions / environment listed in the Catalogs, such as equipment used outdoors or applications in environments subject to chemical pollution or electromagnetic interference
If you would like to use IDEC products in the above applications, be sure to consult with an IDEC sales representative.

3. Inspections

We ask that you implement inspections for IDEC products you purchase without delay, as well as thoroughly keep in mind management/maintenance regarding handling of the product before and during the inspection.

4. Warranty

(1) Warranty period
The warranty period for IDEC products shall be one (1) year after purchase or delivery to the specified location. However, this shall not apply in cases where there is a different specification in the Catalogs or there is another agreement in place between you and IDEC.

(2) Warranty scope
Should a failure occur in an IDEC product during the above warranty period for reasons attributable to IDEC, then IDEC shall replace or repair that product, free of charge, at the purchase location / delivery location of the product, or an IDEC service base. However, failures caused by the following reasons shall be deemed outside the scope of this warranty.
i. The product was handled or used deviating from the conditions / environment listed in the Catalogs
ii. The failure was caused by reasons other than an IDEC product
iii. Modification or repair was performed by a party other than IDEC
iv. The failure was caused by a software program of a party other than IDEC
v. The product was used outside of its original purpose
vi. Replacement of maintenance parts, installation of accessories, or the like was not performed properly in accordance with the user's manual and Catalogs
vii. The failure could not have been predicted with the scientific and technical standards at the time when the product was shipped from IDEC
viii. The failure was due to other causes not attributable to IDEC (including cases of force majeure such as natural disasters and other disasters)
Furthermore, the warranty described here refers to a warranty on the IDEC product as a unit, and damages induced by the failure of an IDEC product are excluded from this warranty.

5. Limitation of liability

The warranty listed in this Agreement is the full and complete warranty for IDEC products, and IDEC shall bear no liability whatsoever regarding special damages, indirect damages, incidental damages, or passive damages that occurred due to an IDEC product.

6. Service scope

The prices of IDEC products do not include the cost of services, such as dispatching technicians. Therefore, separate fees are required in the following cases.

(1) Instructions for installation / adjustment and accompaniment at test operation (including creating application software and testing operation, etc.)
(2) Maintenance inspections, adjustments, and repairs
(3) Technical instructions and technical training
(4) Product tests or inspections specified by you

The above content assumes transactions and usage within your region. Please consult with an IDEC sales representative regarding transactions and usage outside of your region. Also, IDEC provides no guarantees whatsoever regarding IDEC products sold outside your region.
