LIMIT SWITCH

KL Series

KH-8005 Series

KH-8010 Series

KL Series

Features

Housing is made of durable aluminum die - casting.

Heat - resistance, oil - resistance, vibration - resistance structure (protection IP67)

Built - in double - pole double - break standard micro - switches

Operation Indicator (LED or Neon lamp) helps easier inspection and maintenance

Microload models are available

Actuator	Roller lever		75 °	90 °	Roller lever, adjustable roller lever, adjustable rod lever, fork lever lock
	Plunger				Top plunger, top roller plunger, sealed top roller plunger, top ball plunger, side roller plunger
	Flexible rod				Coil spring, coil spring aluminum rod
Load	Standard load	1a1b			Using of normal double pole, double break switch
	Microload	1a1b			
Environment-resistance specification	High enclosed				Using of hermetic sealed built - in switch
	Mold terminal				Lead wire attached Improved hermetic property with epoxy resin in receptacle part
	Heat - resistance	KL - TH			Silicon rubber is used to improve heat - resistance Ambient temperature 120 Available operation temperature (+5 ~ +120)
	Cold - resistance	KL - TC			Silicon rubber is used to improve cold - resistance Ambient temperature - 40 Available operation temperature (- 40 ~ +40)
Operation indicating lamp	KL - LE				Operation state can be monitored easily.
	KL - LD				Turn on lamp when operating, available to turn on lamp when not - in - operating

Actuator

Code	Actuator
CA2	Roller lever (75 ° actuation)
CA2-2	Roller lever (90 ° actuation)
CA12	Adjustable roller lever (75 ° actuation)
CA12-2	Adjustable roller lever (90 ° actuation)
CL	Adjustable rod lever (75 ° actuation)
CL-2	Adjustable rod lever (90 ° actuation)
CA32-41	Fork lever lock
CA32-42	Fork lever lock
CA32-43	Fork lever lock
CA32-44	Fork lever lock
D	Top plunger
D2	Top roller plunger
D28	Sealed top roller plunger
D3	Top ball plunger
SD2	Side roller plunger
NJ	Coil spring
NJ-A2	Coil spring aluminum rod

Lamp Wiring

2	Connecting with NC: Light ON when operating
3	Connecting with NO: Light ON when not operating

Temperature Specification

-	Standard - 10 ~ +80
TH	Heat - resistance +5 ~ +120
TC	Cold - resistance - 40 ~ +40

Product for heat or cold resistance can be applied to roller lever type, adjustable roller lever type and adjustable rod lever type product.

Lever order specification

-	Standard
SA	Forged lever (Aluminum)
SS	STS lever
S50	S lever (Roller O.D. Ø50)
SA50	Forged lever (Roller O.D. Ø50)

Environment - resistance specification

-	Standard
T	Corrosion - resistance
A	Hermetic

Connector order specification

SC-D6SW	Seal connector (DC)
SC-A6SW	Seal connector (AC)

ACTUATION RANGE GUIDE

OF	Required force to actuate	Required force to move from free position (FP) to operating position (OP)
RF	Return force	Required force to return from total travel position (TTP) to return position (RP)
PT	Movement to actuation	Distance or angle of movement from free position (FP) to operating position (OP)
MD	Movement differential	Distance or angle of movement from operating position (OP) to return position (RP)
OT	Movement after actuation	Distance or angle of movement from operating position (OP) to total travel position (TTP)
OP	Operating position	Actuator position when a contact point (NO (normal open)) is actuated (On) at free position (FP).
FP	Free position	Actuator position when no external force is applied to actuator
TTP	Total travel position	Actuator position when actuator arrives at stop.
RP	Return position	Actuator when a contact point (NO) is off at operating position (OP).
TT	Entire movement	Distance or angle of movement from free position (FP) to total travel position (TTP).

RATINGS

USING THE SWITCHES

Instructions	Applicable actuators	Description
<p>The position to install actuator can be changed.</p> <p>Actuator position can be adjusted 360 ° by loosening hex bolt at actuator lever. In case the actuation indicating lamp is attached, please be careful to set the lever rotation because actuator lever may touch the top of lamp cover. Symmetrical lever does not touch the lamp cover.</p>	<p>Roller lever, Adjustable roller lever, Adjustable rod lever</p>	<p>Loosen M5 bolt and adjust its position. And then fix the bolt.</p> 
<p>Head direction can be changed.</p> <p>By unscrewing 4 of corner screws of the head it can be adjusted to any of 4 directions. In this case the control plunger inside shall be adjusted as same.</p>	<p>Roller lever, Adjustable roller lever, Adjustable rod lever, Roller plunger, Side roller, Plunger</p>	
<p>Roller can be installed inside.</p> <p>Roller can be installed inside by attaching roller upside down. (Please set to stop actuation within 180 ° horizontal range).</p>	<p>Roller lever, Fork lever LOCK</p>	 <p>Loosen hex bolt or nut.</p>
<p>Lever rod length can be adjusted.</p> <p>Lever or rod length can be adjusted by loosening hex bolt.</p>	<p>Adjustable roller lever, Adjustable roller lever,</p>	 <p>Loosen hex bolt and adjust lever length.</p> <p>Rod length can be adjusted by unscrewing nut.</p>

LAMP INDICATOR

- It is convenient to check operation state and circuit and to find actuation by neon lamp (for AC power) or LED (for DC power).
- Lamp terminal (indicating lamp cover) connection is made through contact spring (coil spring) by using terminal screw of built-in switch. No wiring is required for lamp terminal.
- Indicating lamp cover is made of transparent resin together with aluminum die - casting so as to assure high sealing property, which allows normal operation even in the environment with cutting oil. Also, it enables monitoring the operating state. Further, it is easy to switch either light ON when Operating or light ON when not operating.
- This is most suitable to verify passing of goods in conveyor line or verifying operation in an area where verification is not easy.
- It ' s not necessary to change polarity for LED type because LED type has rectifying element internally.

Ratings

	Rated voltage	Leakage current	Switch to install lamp	Lamp cover
				Type
Neon lamp	125VAC	0.7mA Max	KL - LE	KL - LE
LED	AC/DC 12~25V	4mA Max	KL - LE	KL - LD

Operation

Factory setting is at “ light ON when operating ” mode.

For “ light ON when not operating ” mode, please switch LED to downward direction as shown in the figure.

SEAL CONNECTOR & CABLE

KL Series

KL series main body can be used as connector type by assembling components .

SEAL CONNECTOR

ITEM	PRODUCT NAME	POWER	NUMBER OF COR WIRES
KL -SC -D6SW	Seal connector type	Direct current (DC)	4 wires
KL -SC -A6SW		Alternating current (AC)	4 wires

SPECIFICATION

Rated Current	10A	6A
Rated voltage	AC125V	AC 250V
Contact resistance	40mΩ or below(DC20mV or below, at 100mA or below)	
Insulation resistance	100MΩ or above(at DC500V)	
Dielectric strength	AC 1500V 1min.(Between live parts / Between dead parts)	
Protection	IP67(IEC529)	
Tightening torque	0.8 NM	
Tensile strength	98N	
Operating temperature	- 25 ~ +70	
Contact pin material	Brass (gold plating)	
Fixture material	Brass (nickel plating)	
Pin block material	PBT Glass(UL94 - V0)	
O-ring material	NBR	
Housing material	Polyester elastomer	
Cord property (cable)	Increased resistance to oil / increased flexibility (300V 80)
