TW Series

General-purpose switches & pilot lights for various applications.
Heavy-duty type for high-level protection against harsh environment.

- DC-DC converter types are not approved by standards.
- See website for details on approvals and standards.

ø22 TW Series Switches & Pilot Lights

General-purpose switches & pilot lights for various applications.
Heavy-duty type for high-level protection against harsh environment.

- Easy wiring for crimping terminal.
- UL, CSA, TÜV, CCC compliant.

Specifications and Ratings

Contact Ratings

Pushbuttons Illuminated Pushbuttons Selector Switches Illuminated Selector Switches	Rated insulation voltage	600V
	Rated continuous current	10A
	Contact ratings by utilization category IEC60947-5-1	AC-15 (A600) DC-13

Contact Ratings by Utilization Category

HW-U10 (NO contact), HW-U01 (NC contact)

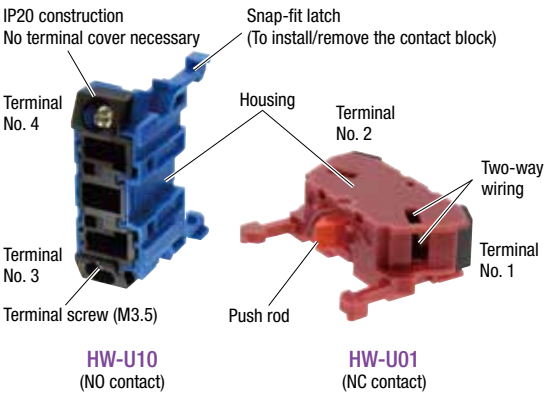
Operating Voltage			24V	48V	50V	110V	220V	440V
Operating Current	AC 50/60 Hz	AC-12 Control of resistive loads and solid state loads	10A	—	10A	10A	6A	2A
		AC-15 Control of electromagnetic loads (> 72 VA)	10A	—	7A	5A	3A	1A
	DC	DC-12 Control of resistive loads and solid state loads	10A	5A	—	2.2A	1.1A	—
		DC-13 Control of electromagnets	5A	2A	—	1.1A	0.6A	—

HW-U10R (EM contact/NO contact), HW-U01R (LB contact/NC contact)

Operating Voltage			24V	48V	50V	110V	220V	440V
Operating Current	AC 50/60 Hz	AC-12 Control of resistive loads and solid state loads	5A	—	5A	5A	3A	1A
		AC-15 Control of electromagnetic loads (> 72 VA)	5A	—	3.5A	2.5A	1.5A	0.5A
	DC	DC-12 Control of resistive loads and solid state loads	5A	2.5A	—	1.1A	0.55A	—
		DC-13 Control of electromagnets	2.5A	1A	—	0.55A	0.3A	—

- The operating current represents the classification by making and breaking currents (IEC 60947-5-1).
- Contact materials: Silver contacts
- Minimum applicable load: 3V AC/DC, 5 mA (applicable range may vary with operating conditions and load types)

HW-U Contact Block



Part No.	HW-U10	HW-U01	HW-U10R	HW-U01R
Contact	1NO	1NC	EM (NO) (early make)	LB (NC) (late break)
Contact No.	3-4	1-2	3-4	1-2
Housing	Blue	Purple red	Blue	Purple red
Push Rod	Green	Red	Black	White
Weight	Approx. 11g			

- Up to 2 layers (4 blocks) can be attached. AYW: 2 blocks (1 layer) maximum.
- Gold contacts available (gold-plated silver)

LED Illuminated Part Specifications

Rated Voltage	6, 12, 24V AC/DC	100 to 240V AC	380V AC minimum	110V DC	6, 12, 24V AC/DC
Polarity	None	None	None	X1 (+) X2 (–)	None
Shape/Terminal					

LED Lamp Ratings

LSRD

Part No.		LSRD-6	LSRD-1	LSRD-2
Lamp Base		BA9S/13		
Rated Voltage		6V AC/DC	12V AC/DC	24V AC/DC
Voltage Range		6V AC/DC ±10%	12V AC/DC ±10%	24V AC/DC ±10%
Current Draw	DC	10mA	7mA	7mA
	AC	14mA	8mA	8mA
Voltage Marking		Die stamped on the base		
Life (reference value)		Approx. 50,000 hours (The luminance is reduced to 50% the initial intensity when used on complete DC at 25°C.)		
Internal Circuit		 Example: LSRD-2 		
Weight		Approx. 2g		

• Only one color is available for LSRD so there are no codes to specify the color in the part no.

Specifications

Operating Temperature			–25 to +50°C (no freezing)
Operating Humidity			45 to 85% RH (no condensation)
Storage Temperature			–40 to +80°C (no freezing)
Contact Resistance			50 mΩ maximum (initial value)
Insulation Resistance			100 MΩ minimum (500V DC megger)
Dielectric Strength			Between live and dead metal parts: 2,500V AC, 1 minute (Full voltage and illuminated units: 2,000V AC, 1 minute)
Vibration Resistance	Operating extremes		5 to 55 Hz, amplitude 0.5 mm
	Damage limits		30 Hz, amplitude 1.5 mm
Shock Resistance	Operating extremes		100m/s^2
	Damage limits		1,000m/s^2 (*5)
Mechanical Life (minimum operations)	Pushbutton	Momentary	5,000,000
		Maintained	500,000 (3 contact blocks and over: 250,000)
		Push-to-lock, Turn-to-reset	500,000

	Illuminated pushbutton	Momentary	5,000,000
		Maintained	500,000 (3 contact blocks and over: 250,000)
		Push-to-lock, Turn-to-reset	500,000
	Selector switch		500,000
	Key selector switch		500,000
	Illuminated selector switch		500,000
Electrical Life (*4) (minimum operations)	Pushbutton	Momentary	500,000 (*1)
		Maintained	500,000 (3 contact blocks and over: 250,000) (*3)
		Push-to-lock, Turn-to-reset	500,000 (*3)
		Other	500,000
	Illuminated pushbutton	Momentary	500,000 (*1)
		Maintained	500,000 (3 contact blocks and over: 250,000) (*3)
		Push-to-lock, Turn-to-reset	500,000 (*3)
	Selector switch		500,000 (*2)
	Key selector switch		500,000 (*2)
	Illuminated selector switch		250,000 (*2)
Weight (Apporox.)			68g (ABW122) 33g (APW122D) 89g (ALW22222D) 68g (ASW222) 107g (ASW2K22) 90g (ASLW22222D) 95g (APW126D)

*1) Switching frequency 1,800 operations/h, duty ratio 40%
*2) Switching frequency 1,200 operations/h, duty ratio 40%
*3) Switching frequency 900 operations/h, duty ratio 40%
*4) Load condition 220V AC, 3A (AC-15)
*5) Illuminated unit with four contact blocks with transformer and DC-DC converter types: 500 m/s^2

Degree of Protection

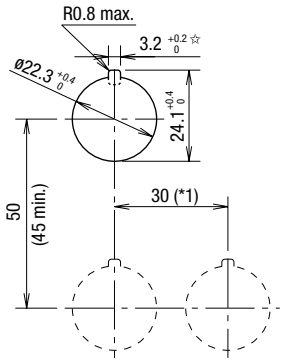
Unit		IEC 60529
A□□□□ (Part number that starts with "A")	Pushbutton Pilot light Illuminated pushbutton with round lens Selector switch	IP65
	Pushlock key reset pushbutton Illuminated selector switch Key selector switch	IP54

For harsh environment such as torrid/frigid area

TW series for harsh environment such as torrid/frigid area is also available (not approved by standards). Contact IDEC for details.

Mounting Hole Layout

Panel Cut (IEC60947-5-1)



All dimensions in mm.

- The minimum mounting centers are applicable to switches with one layer of contact blocks (one to two contact blocks). When two layers of contact blocks are mounted, determine the minimum mounting centers in consideration of convenience for wiring.
  1*) ø40 mm mushroom button type: 40 mm minimum
  1*) 2-position, 3-position lever selector switch: 39 mm minimum
  1*) 4-position, 5-position lever selector switch: 50 mm minimum
- When high temperature is expected, take necessary measures such as securing sufficient mounting centers or using a cooling fan.
- The ☆3.2 $^{+0.2}_{0}$ mm recess is for preventing rotation and is not necessary when the nameplate or anti-rotation ring is not used.

Ordering Information

Standard models

- Specify Ordering No. when ordering.
- Specify a button or lens color code in place of ∗.
- An LED lamp is installed in pilot lights, illuminated pushbuttons, and illuminated selector switches unless otherwise specified.
- Pilot light of full voltage adapter type is equipped with a terminal cover.
- Nameplates and accessories are ordered separately. See B-256 to B-259.
- Color codes for units without LED lamps:
  R (red), G (green), A (amber), Y (yellow), S (blue)
  When using a commercially available lamp, choose a lamp with rated voltage 5 to 30V AC/DC and 1W maximum, and with the same base and shape. Make sure of correct operation before installation. The operation of TW series cannot be guaranteed when a commercially available lamp is used.

Pushbuttons (B-238 to B-240)

When specifying gold-plated silver contact and contact configuration:

ABW 1 11 R - MAU

- 11: Contact configuration
- MAU: Optional contact

MAU: Gold contact
10: 1NO
01: 1NC
11: 1NO1NC
20: 2NO
02: 2NC
22: 2NO2NC
40: 4NO
04: 4NC
13: 1NO3NC
31: 3NO1NC
30: 3NO
03: 3NC
12: 1NO2NC
21: 2NO1NC

- Pushbuttons with 1 or 3 contact blocks have a dummy block.
- Push-pull type AYW4 (B-240) can have a maximum of two contact blocks.

Pilot Lights (B-241)

When specifying LED operating voltage:

APW 2 126 DR

- 126: Operating voltage

99: Without LED lamp
66: 6V AC/DC
11: 12V AC/DC
22: 24V AC/DC
16: 100/110V AC
126: 115/120V AC
26: 200/220V AC
246: 230/240V AC
386: 380V AC
46: 400/440V AC
486: 480V AC

- See B-237 for how to specify 110V DC type (DC-DC converter).

Note: Color codes for units without LED lamps: R (red), G (green), A (amber), Y (yellow), S (blue)
When using a commercially available lamp, choose a lamp with rated voltage 5 to 30V AC/DC and 1W maximum, and with the same base and shape. Make sure of correct operation before installation. The operation of TW series cannot be guaranteed when a commercially available lamp is used.

Ordering Information

Illuminated Pushbuttons (B-243 to B-246)

When specifying gold-plated silver contact, contact configuration, and LED operating voltage:

ALFW 2 26 13 DR - MAU

- Optional contact / Contact configuration

MAU	Gold contact
10:	1NO
01:	1NC
11:	1NO1NC
20:	2NO
02:	2NC
21:	2NO1NC
12:	1NO2NC
30:	3NO
03:	3NC
31:	3NO1NC
22:	2NO2NC
13:	1NO3NC
40:	4NO
04:	4NC

- Operating voltage

99:	Without LED lamp
66:	6V AC/DC
11:	12V AC/DC
22:	24V AC/DC
16:	100/110V AC
126:	115/120V AC
26:	200/220V AC
246:	230/240V AC
386:	380V AC
46:	400/440V AC
486:	480V AC

Note:
- Illuminated pushbuttons of 24V AC/DC and below with 2 or 4 contact blocks have a dummy block.
- Illuminated pushbuttons of 100V AC and over is not available with 1 or 3 contact blocks.
- See B-237 for how to specify 110V DC type (DC-DC converter).
- Color codes for units without LED lamps:
  R (red), G (green), A (amber), Y (yellow), S (blue)
  When using a commercially available lamp, choose a lamp with rated voltage 5 to 30V AC/DC and 1W maximum, and with the same base and shape. Make sure of correct operation before installation. The operation of TW series cannot be guaranteed when a commercially available lamp is used.

Selector Switches (B-249 to B-251)

When specifying gold-plated silver contact, key removal position, and key number:

ASW 2 11 - MAU

- Optional contact: MAU: Gold-plated silver
- Contact arrangement codes: See B-253 to B-255.

How to specify key removal/retained position

Position		Removable Position	Code	Part No. Example
2-position	Maintained	Removable in all positions	—	ASW2K20
		Removable in left only	B	ASW2K20B
		Removable in right only	C	ASW2K20C
	Spring return from right	Removable in left only	—	ASW21K20
	Spring return from left	Removable in right only	—	ASW22K20
3-position	Maintained	Removable in all positions	—	ASW3K20
		Removable in left and center only	B	ASW3K20B
		Removable in right and center only	C	ASW3K20C
		Removable in center only	D	ASW3K20D
		Removable in right and left only	E	ASW3K20E
		Removable in left only	G	ASW3K20G
		Removable in right only	H	ASW3K20H
	Spring return from right	Removable in left and center only	—	ASW31K20
		Removable in center only	D	ASW31K20D
		Removable in left only	G	ASW31K20G
	Spring return from left	Removable in right and center only	—	ASW32K20
		Removable in center only	D	ASW32K20D
		Removable in right only	H	ASW32K20H
	Spring return two-way	Removable in center only	—	ASW33K20

- The key cannot be removed in a spring returned position.

Ordering Information

Illuminated selector switches (B-252)

When specifying gold-plated silver contact, contact configuration, and LED operating voltage:

ASLW 2 136 22 DR - MAU

- MAU: Optional contact — MAU Gold contact
- 22: Contact arrangement codes — See B-253 to B-255.
- 136: Operating Voltage

99:	Without LED lamp
66:	6V AC/DC
11:	12V AC/DC
22:	24V AC/DC
16:	100/110V AC
136:	115/120V AC
26:	200/220V AC
256:	230/240V AC
386:	380V AC
46:	400/440V AC
486:	480V AC

Note:

- Illuminated selector switches of 24V AC/DC and below with 2 or 4 contact blocks have a dummy block.
- Illuminated selector switches of 100V AC and over is not available with 1 or 3 contact blocks.
- See below for how to specify 110V DC type (DC-DC converter).
- Color codes for units without LED lamps:
  R (red), G (green), A (amber), Y (yellow), S (blue)
  When using a commercially available lamp, choose a lamp with rated voltage 5 to 30V AC/DC and 1W maximum, and with the same base and shape.
  Make sure of correct operation before installation. The operation of TW series cannot be guaranteed when a commercially available lamp is used.

DC-DC Converter (110V DC)

When specifying illuminated pushbuttons, illuminated selector switches, and pilot lights:

ALW 2 16 22 DDG

- 16: Operating Voltage — 16□D

ASLW 2 16 11 DDY

- 16: Operating Voltage — 16□D

APW 1 16 DDR

- 16: Operating Voltage — 16□D

Note:

- DC-DC converter type (110V DC) is not approved by standards (90 to 140V DC).
- DC-DC converter type is not available with 1 or 3 contact blocks.

Flush / Extended / Mushroom Pushbuttons

- Specify a color code in place of ∗ in Part No. B (black), G (green), R (red), Y (yellow), S (blue), W (white)
- Round bezel (metal): Mat aluminum color
- Square bezel (plastic): Black
- Pushbuttons with one or three contact blocks contain a dummy block.
- See B-235 for other contact configurations and gold-plated silver contacts.
- Push-pull switch can have a maximum of two contact blocks.
- Pushbuttons: terminal screws M3.5, integrated terminal cover
- See B-238 for bottom view.

*1) AXW4 pushbuttons with red operator cannot be used as emergency stop switches. When emergency stop switches are required, use XW series pushbuttons (ISO 13850 and IEC 60947-5-5 compliant).

Pushbutton operation

Push-Pull

2-position switches with button maintained in both depressed and reset positions.

- Knob operator: white indicator on black body
- Cylinder: Mat aluminum color
- Selector switches with one or three contact blocks contain a dummy block.
- Spring return is not available with contact code 3S.
- On the contact arrangement marked with ☆ in the table above, the rated current (load switching current) is reduced to a half of the related current of the contact block. The rated insulation voltage and the rated thermal current remain unchanged.
- For models with ☆, contacts may overlap when the operator position is changed.
- Other contact arrangements are also available. See B-253 to B-255.
- Optional selector operators and color inserts are available.
- See B-236 for gold-plated silver contacts.
- Turn the operator to each position accurately.

Contact Block Mounting Position

- Lever operator: white indicator on black body
- Cylinder: Mat aluminum color
- Selector switches with one or three contact blocks contain a dummy block.
- Spring return is not available with contact code 3S.
- On the contact arrangement marked with ☆ in the table above, the rated current (load switching current) is reduced to a half of the related current of the contact block. The rated insulation voltage and the rated thermal current remain unchanged.
- For models with ☆, contacts may overlap when the operator position is changed.
- Other contact arrangements are also available. See B-253 to B-255.
- Optional selector operators and color inserts are available.
- See B-236 for gold-plated silver contacts.
- Turn the operator to each position accurately.

ø22 TW Series Accessories

Accessories

All dimensions in mm.

Shape	Material	Part No.	Ordering No.	Package Quantity	Dimensions
Tool — Locking Ring Wrench 	Nitryl rubber	**OR-14**	OR-14	1	• Used to tighten the round bezel when installing the TW switch onto a panel. Tool — Lamp Holder Tool 	Nitryl rubber	**OR-55**	OR-55	1	• Used to install and remove the LED lamps. See B-266 for how to install. Ⓐ : BA9S Tool — Contact Block Removal Tool 	Zinc-plated metal Nitryl rubber	**TW-KC1**	TW-KC1	1	• Used to remove the transformer, to install/ remove the waterproof lens and pilot light lens. Can also be used to determine panel thickness (1, 1.6, 2, 2.3, 3.2, 5 mm). Tool — Nut Locking Wrench 	Metal (nickel-plated)	**TW-KQ2**	TW-KQ2	1	• Used to tighten the locking nuts inside of the square bezel. This tool can be inserted into the OR-14 locking ring wrench. Anti-rotation Ring 	Metal (zinc-plated)	**OGL-31**	OGL-31PN10	10	• Used to prevent the operator from turning. Generally used when using no nameplates on selector switches. • Installed on the front of panel. Rubber Mounting Hole Plug 	Nitril rubber (black)	**OB-31**	OB-31PN05	5	• Used to plug unused ø22.2mm mounting holes. • Degree of protection: • IP65 (round mounting hole) • IP40 (with anti-rotation function) Metallic Mounting Hole Plug 	Plug: chrome-plated zinc diecast Locking ring: polyamide	**LW9Z-BM**	LW9Z-BM	1	• Used to plug the unused ø22.2 mm mounting holes. Degree of protection: IP66 (round hole) IP40 (with anti-rotation function) Tightening torque: 1.2 N·m Plastic Mounting Hole Plug 	Polyamide (black)	**LW9Z-BP1**	LW9Z-BP1	1	• Used to plug the unused ø22.2 mm mounting holes. Degree of protection: IP65 Tightening torque: 2.0 N·m Barrier 	Polyamide	**HW-VU1**	HW-VU1PN10	10	• Used to prevent contact between adjacent lead wires when units are mounted closely (see B-266 for details). Barriers should always be used in close mounting. 
Accessories

All dimensions in mm.

Shape		Material	Part No.	Ordering No.	Packaging Quantity	Description
Contact Rubber Boot 	① For 1 layer of contact blocks (2 contact blocks)	Nitryl rubber (black)	**OCW-99**	OCW-99	1	• Oiltight rubber boot used for the contact blocks of pushbuttons and selector switches. • Temperature range: –5 to +60°C OCW-99 	② For 2 layers of contact blocks (4 contact blocks)		**OCW-299**	OCW-299	1	OCW-299 Button Clear Boot 	For flush pushbuttons	Rubber (EPDM)	**OC-31**	OC-31	1	• Used to cover and protect pushbuttons where units are subject to water splash. Not suitable for outdoor use or where the units are subject to oil splash. • Cannot be used with nameplates NWA, NWAQ, NWAS, NWAL, or NWAQL. 	For extended pushbuttons		**OC-32**	OC-32	1	
Button Cover 	① For flush pushbuttons	Nitryl rubber	**OCW-10∗**	OCW-10∗	1	• Used to cover the bezels to enhance waterproof characteristics of pushbuttons. • Button is installed in the cover. Remove the button from the pushbutton before using the button cover. Make sure to align the button with the axis on the switch. • Using the button cover enhances oilproof characteristics. • Specify a color code in place of * in Ordering No. B (black), G (green), R (red), Y (yellow) • Operating temperature: –5 to +60°C 	② For extended pushbuttons		**OCW-11∗**	OCW-11∗	1	
Padlock Cover 		Polyarylate (gasket: nitryl rubber)	**HW9Z-KL1**	HW9Z-KL1	1	• Used to protect momentary and maintained pushbuttons, illuminated pushbuttons, knob and key selector switches. Padlock Cover for Key Selector Switches 		Metal (steel)	**HS9Z-PC22**	HS9Z-PC22	1	Used for ASW☐K key selector switches.

					LSTD-2*PN10	R, G, A, S, PW	10	

- Only one color is available for LSRD so there are no codes to specify the color in the part no.
- When replacing the LED with LSRD, the lens must also be replaced (see B-260).

LED lamps for replacing incandescent lamps

- Use the following replacement LED lamps to replace incandescent lamps.
- See TW series LED lamps shown above for ordering.
- LED lamps may have different brightness/color hue compared with incandescent lamps.

Incandescent Lamp					Replacement LED Lamp		
Model (mm)	Part No.	Operating Voltage	Lamp Rating	Base	Part No.	Operating Voltage	Base
LS  Bulb: ø11 Length: 23	LS-6	6V AC/DC	1W (6V)	BA9S/13	LSRD-6	6V AC/DC	BA9S/13
	LS-8	12V AC/DC	1W (18V)		LSRD-1	12V AC/DC	
	LS-2	18V AC/DC	1W (24V)		LSRD-2	24V AC/DC	
	LS-3	24V AC/DC	1W (30V)		LSRD-2	24V AC/DC	

- Only one color is available for LSRD so there are no codes to specify the color in the part no.
- When replacing incandescent lamps to LSRD, the lens must also be replaced (see B-260).

Transformer

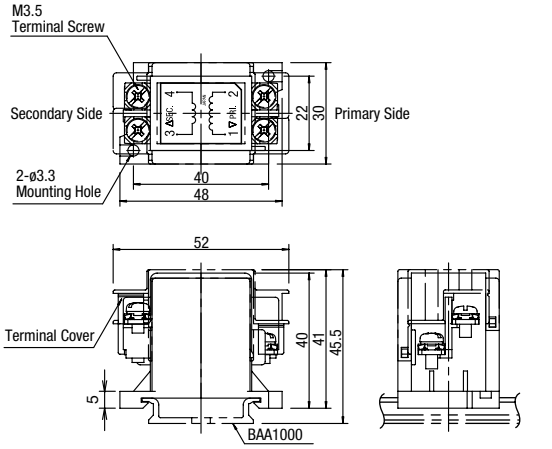
Shape	Rated Voltage	Operating Voltage Range	Ordering No.	Applicable Load
6V 	100/110V AC	100/110V AC ±10%	TWR516	LSRD-6, LSTD-6* (6V AC/DC, LED lamp)
	200/220V AC	200/220V AC ±10%	TWR526	
	400/440V AC	400/440V AC ±10%	TWR546	
24V CE 	100/110V AC	100/110V AC ±10%	TWR512	LSRD-2, LSTD-2* (24V AC/DC, LED lamp)
	200/220V AC	200/220V AC ±10%	TWR522	
	400/440V AC	400/440V AC ±10%	TWR542	

- Terminal cover (TWR-VL3) is installed on transformers as standard.
- Transformer is installed to one TW series unit.

Specifications

Part No.	TWR5□6	TWR5□2
Operating Voltage	100/110V AC, 200/220V AC, 400/440V AC (50/60Hz)	
Current Draw	2.4VA	
Rated Insulation Voltage	600V	
Insulation Resistance	100MΩ minimum (500V DC megger)	
Operating Temperature	–30 to +60°C (no freezing)	
Operating Humidity	35 to 85% RH (no condensation)	
Storage Temperature	–40 to +80°C (no freezing)	
Vibration Resistance	Damage limits: 30Hz, amplitude 1.5 mm Operating extremes: 5 to 55Hz, amplitude 0.5 mm	
Shock Resistance	Damage limits: 1,000 m/s^2 Operating extremes: 100 m/s^2	
Dielectric Strength	2500V AC, 1 minute	
Terminal Screw	M3.5	
Applicable Wire	2mm^2 maximum, 2 wires maximum	
Weight (approx.)	87g	

Dimensions



All dimensions in mm.

Accessories

Shape	Material	Part No.	Ordering No.	Package Quantity	Dimensions (mm)
DIN 35mm Rail  Weight: 200g approx.	Aluminum Length: 1000mm	**BAA1000**	BAA1000PN10	10	End Clip  Weight: 15g approx.	Metal (zinc-plated steel) Applicable rail: BAA1000 BAP1000	**BNL6**	BNL6PN10	10	
- See H-071 for DIN rail products.

Safety Precautions

- Turn off the power to the TW series switches & pilot lights before starting installation, removal, wiring, maintenance, and starting installation, removing, wiring, maintenance, and inspection of the products. Failure to turn power off may cause electrical shocks or fire hazard.
- To avoid a burn on your hand, use the lamp holder tool when replacing lamps.
- For wiring, use wires of a proper size to meet the voltage and current requirements. Tighten the terminal screws to the recommended tightening torque (see B-268). Failure to tighten terminal screws may cause overheat and fire.
- When using a commercially available lamp, choose a lamp with rated voltage 5 to 30V AC/DC and 1W maximum, and with the same base and shape. Make sure of correct operation before installation. The operation of illuminated pushbutton switches cannot be guaranteed when a commercially available lamp is used.

Operating Instructions

Panel Mounting

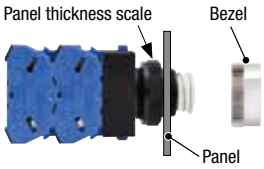
Panel thickness adjustment ring is used for the TW series. To attach the TW series to the panel, follow the procedures below.

Panel Thickness Adjustment

See "Adjusting Panel Thickness" below.

Mounting the Unit onto the Panel

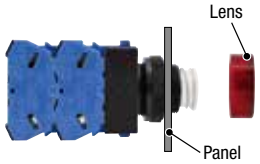
After adjusting the panel thickness, attach the unit to the panel with the panel thickness scale facing up, and attach the bezel. See "2. Installing the Round/Square Bezel" for installing the bezel.



Attach a nameplate before installing the bezel.

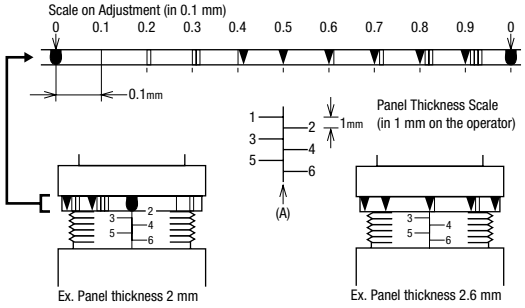
Attaching the Button, Lens, and Knob

See "3. Installing Buttons, Lenses, and Operators."



1. Adjusting Panel Thickness

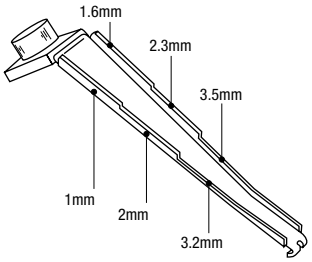
The panel thickness ring provides adjustment from 1 to 6 mm in 0.1-mm increments. Set the panel thickness to line A. Rotate the ring until the desired thickness indication around the periphery is aligned with line A, as shown below.



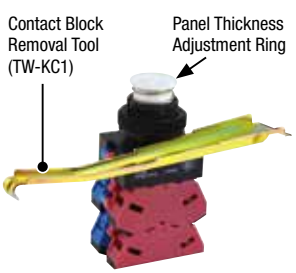
Note: When a nameplate or an anti-rotation ring is used, add 0.8 mm to the panel thickness.
Total thickness = Panel thickness + 0.8 mm (nameplate or anti-rotation ring thickness)

When the adjustment value is 1, 1.6, 2, 2.3, 3.2, or 3.5 mm.

Panel thickness can be adjusted easily to the values shown below by inserting the contact block removal tool between the adjustment ring and base.



Contact Block Removal Tool



2. Installing the Round/Square Bezel

Round bezel

All round bezels are screw-in type.
Be sure to use the locking ring wrench (OR-14) to tighten the bezel to a torque of 2.0 N·m.

Use side B when mounting the units closely.

Square bezel

Install the TW series on the panel from the back, and follow the instructions below.

(1) Insert the base plate from the front.

(2) Insert the lock nut. For easy installation, use the nut locking wrench.

(3) Mount the square bezel. The bezel will snap onto the base plate.

Nut Locking Wrench TW-KQ2 (optional)

Lock nut can be installed easily by using the nut locking wrench (TW-KQ2). Tightening torque is 2.0 N·m.

3. Installing Buttons, Lenses, and Operators

Pushbuttons

Flush/Extended/Square

Push in the button to install.

Mushroom

Button has threads.
Turn clockwise to install the button.

Illuminated Pushbutton/Pilot Light Lens

Extended

Lens has threads.
Turn clockwise to install the button.

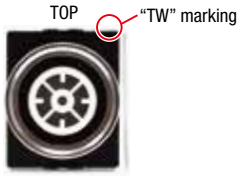
Round/Flush

Lens has threads.
Turn clockwise to install the button.

Operating Instructions

Installing the Operator on Selector Switches

(1) Install the switch with TW marking facing upward, so that the operator can be installed on the switch in the correct direction.



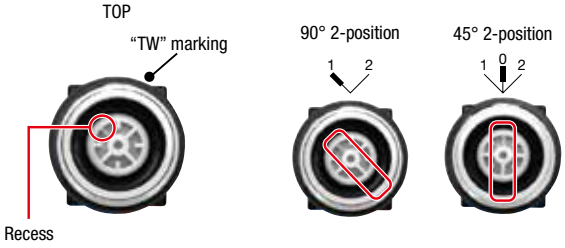
(2) On non-illuminated models, install the color insert in the middle of operator. The color insert also serves to retain the operator.

(3) On illuminated models, align the operator with the switch by confirming the TOP marking on the switch and also the switch operation. Then press in the operator into the switch.

Installation of Selector Operators

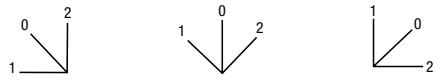
The shaft of each non-illuminated selector switch has a recess to identify the direction to install the operator. Align the operator with the recess and press in the operator. Press a color insert (non-illuminated) into the operator (illuminated selector switches do not have a recess on the shaft).

Non-illuminated Selector Switches



In addition to the standard positions shown below, the non-illuminated operators can be installed 45° intervals.

(Ex.)

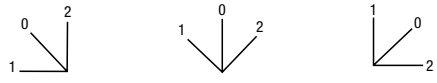


(Standard positions)

Illuminated Selector Switches

In addition to the standard positions shown below, the non-illuminated operators can be installed 45° intervals.

(Ex.)



(Standard positions)

Removing the Buttons and Lenses

Pushbuttons

Flush/Extended/Square

Insert a flat screwdriver between the button and the bezel to remove the button

Mushroom

The button has threads. Turn the button counterclockwise to remove.

Illuminated Pushbutton/Pilot Light Lens

Extended

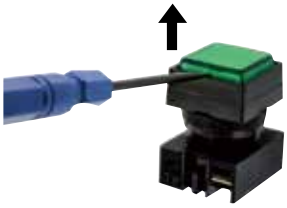
The lens has threads. Turn the lens counterclockwise to remove.

Round/Flush

The lens has threads. Turn the lens counterclockwise to remove.

Square Lens

Insert a flat screwdriver between the lens and bezel, and tilt the screwdriver to remove the lens.



⚠ Notes

- The square lens of the illuminated pushbutton cannot be used without waterproof lens. Always use the waterproof lens.
- Be sure to use the marking plate even when marking is not required.

Non-illuminated Selector Switches

Insert a flat screwdriver with tip width 4.5 mm maximum into the recess under the color insert. Turn the screwdriver to push out the insert from the operator.

Pull out the operator sideways as shown in the left photo to remove the operator.

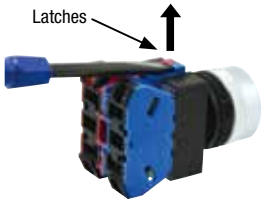
Illuminated Selector Switches

Insert a flat screwdriver with tip width 5 mm maximum into the recess opposite from the color insert and tilt. The operator is displaced slightly.

Operating Instructions

Removing the Contact Blocks/Full Voltage Adapters

Insert a flat screwdriver (4 to 6 mm) into the snap-fit latches of the contact block or full voltage adapter and lift to remove.

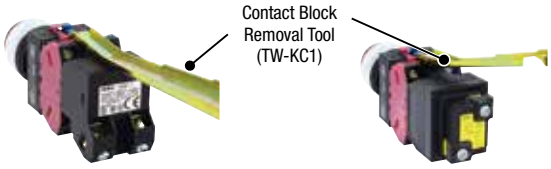


- Make sure to lift both latches. Contact blocks cannot be removed by lifting one latch only.
- Do not apply excessive force to the latches, otherwise damage maybe caused.

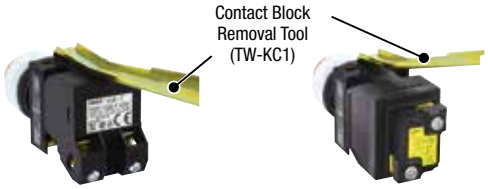
Transformer Units and DC-DC Converters

Insert the end of the contact block removal tool (TW-KC1) into the snap-fit latch of the transformer units or DC-DC converter and pull the tool forward.
The contact block removable tool cannot be used to remove the contact blocks (HW-U), full voltage adapters (HW-GA1N), or dummy blocks (HW-DB).

Illuminated Pushbuttons/Illuminated Selector Switches



Pilot Lights



⚠ Notes on Replacing Units

When replacing parts (contact block, dummy block, full voltage adapter, transformer) for maintenance, make sure to install the parts to the original position. Otherwise proper operation cannot be guaranteed.

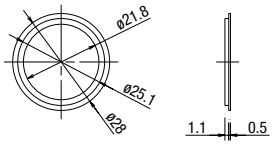
Using a Ring Adapter

- **HW9Z-A25**

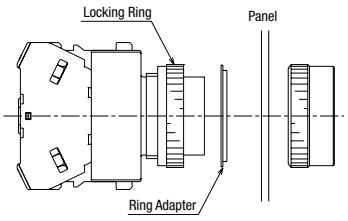
Install the ring adapter between the HW series unit and panel. Make sure that the side with ridges face the panel.

Nitryl Rubber

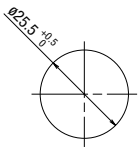
Dimensions



Installation

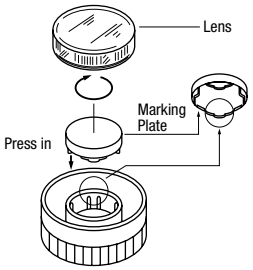


Panel Cut-out

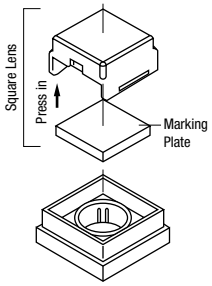


Marking Plate

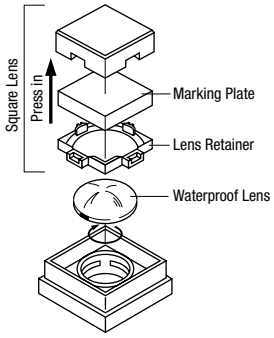
- **Round Pilot Lights (Marking Type)**



- **Square Pilot Lights (Marking Type)**

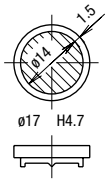


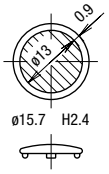
- **Square Illuminated Pushbuttons**

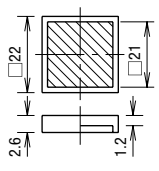


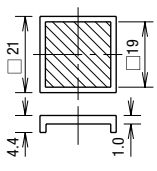
Marking Plate Engraving Area

Marking is possible on all square lens. To engrave, take out the marking plate inside the lens.

Round	Round (ø29/ø40)	Square (Pilot Light)	Square (Illluminated Pushbutton)
			






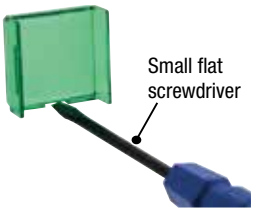


Note: The depth of the engraving must be within 0.5 mm.

Removing the Marking Plate

- **Pilot Lights**

Insert the screwdriver into the recess of the lens.

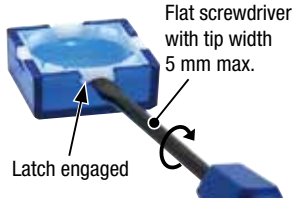


Operating Instructions

Removing the Marking Plate

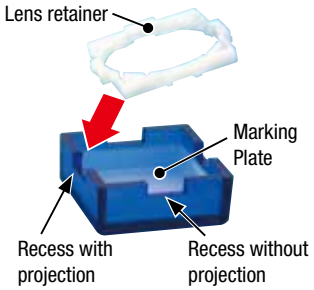
• Illuminated Pushbuttons

Remove the lens retainer by inserting a small flat screwdriver into a recess with a projection on the lens, and tilt lightly. Turn over the lens to remove the marking plate. Lightly tap the lens on a flat surface if necessary.



Installing the Lens Retainer

Install the marking plate into the lens, with flat surface facing the lens. Then install the lens retainer into the lens, by fitting a projection of the lens retainer into the recess with projection as shown at right.

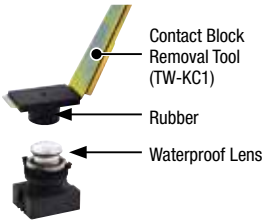


Turn over and press as shown at right so that the lens retainer is installed securely.

⚠ Notes

The square lens of the illuminated pushbutton cannot be used without waterproof lens. Always use the waterproof lens.
Be sure to use the marking plate even when it is not engraved.

• Installing Round Lens and Waterproof Lens



When installing or removing round lens of pilot lights and illuminated pushbuttons and waterproof lens of square pilot lights and illuminated pushbuttons, press the rubber part of the contact block removal tool onto the lens or waterproof lens for secure tightening and easy removal.

Replacement of LED Lamps

Lamps can be replaced by using the lamp holder tool (OR-55) from the front of the panel. (See B-257 for lamp holder tool.)

• How to Remove

To remove, slip the lamp holder tool onto the lamp head lightly. Then push slightly, and turn the lamp holder tool counterclockwise.

• How to Install

To install, insert the lamp head into the lamp holder tool. Place the two pins on the lamp base to the grooves in the lamp socket. Inset the lamp and turn it clockwise.

Selector Switches

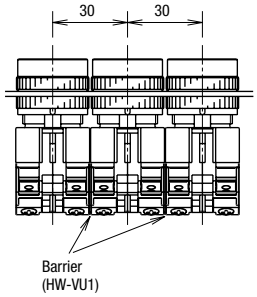
Turn the operator such as knob, lever, and key to each position accurately. Releasing halfway may cause the operator to return to the former position, or to get stuck between. On spring return two-way types, the center of operators may be misaligned slightly.

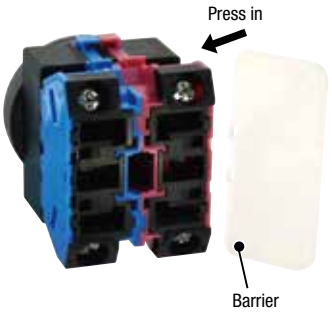
Key Selector Switches

Insert the key completely before turning. Failure to do so may cause failures.

Collective Mounting

When mounting the units closely in a horizontal row on 30-mm centers, use optional barriers (HW-VU1) to prevent interconnection between adjoining terminals. The barriers can be attached simply by pressing them onto the sides of contact blocks.

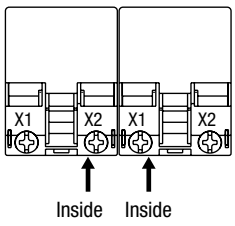




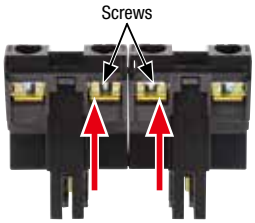
- Use a barrier (HW-VU1) between the contact blocks.
- Sufficient insulation distance cannot be obtained if barriers are not installed, or when other barriers such as HW-VG1 is used.

• Notes on Wiring Transformer Type Units

When using transformer type illuminated TW series of 240V AC maximum closely in a horizontal row on 30 mm centers, insert straight the solid wires or stranded wires into inside of the terminal screw on the transformer (see figure below) to prevent short circuit between adjoining terminals.



Enlarged View of Terminal Part



When using transformer type pilot lights closely mounted in horizontal and vertical rows on 30 mm centers, keep the ambient temperature below 40°C.

Operating Instructions

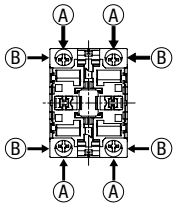
Applicable Wiring

(1) Contact Block 0.3 to 3.5 mm² (solid wire ø0.5 to 2.0 mm)

Pushbutton/illuminated pushbutton/selector switch/ illuminated selector switch

Ⓐ and Ⓑ show the wiring direction to the terminals.

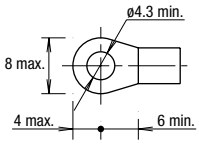
<Contact Block>
Terminal screws M3.5 (spring-up)

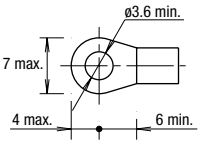


Applicable Crimping Terminal

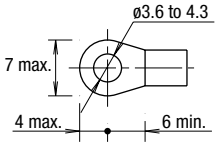
Be sure to use an insulation tube or cover on the crimping part of the crimping terminal to prevent electrical shocks.

Crimping terminal for Ⓐ



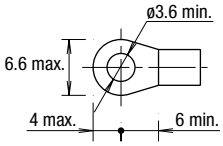


IP20 crimping terminal

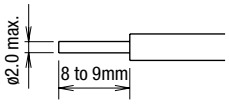


Crimping terminal for Ⓑ

IP20 crimping terminal



Solid wire



- Strip the wire insulation 8 to 9 mm from the end.
- Insert the wire until the insulation comes into contact with the terminal metal part.

(1)-1 IP20 Degree of Protection

The terminal of HW-U contact block has IP20 degree of protection. When IP20 is required for wiring, observe the followings. Make sure to insert the crimping terminal or wire to the terminal straight and fully.

When using a crimping terminal

Use IP20 crimping terminals.

When using a solid wire

Strip the wire insulation 8 to 9 mm from the end and insert the wire to the terminal fully.

When using a stranded wire

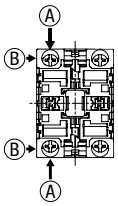
Strip the wire insulation 8 to 9 mm from the end and insert the wire to the terminal fully. Make sure that the wires are not loosened.

(2) Power Unit 0.3 to 2 mm² (solid wire ø0.5 to 1.6 mm)

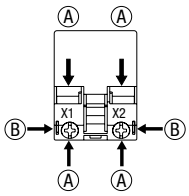
Illuminated pushbutton/illuminated selector switch

Ⓐ and Ⓑ show the wiring direction to the terminals.

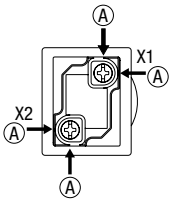
<Full Voltage Adapter>
Terminal screws M3.5 (spring-up)



<Transformer Unit>
100/110V AC, 200/220V
Terminal screws M3.5 (spring-up)



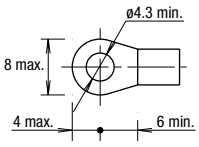
<DC-DC Conver Unit/Transformer Unit>
110V DC, 380V
Terminal screws M3.5 (spring-up)



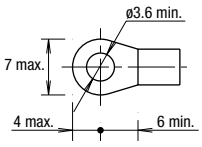
Applicable Crimping Terminal

Be sure to use an insulation tube or cover on the crimping part of the crimping terminal to prevent electrical shocks.

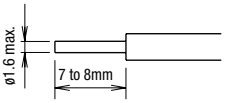
Crimping terminal for Ⓐ



Crimping terminal for Ⓑ



Solid wire



- Strip the wire insulation 7 to 8 mm from the end.
- Insert the wire until the insulation comes into contact with the terminal metal part.

- Terminal cover is integrated in the full voltage adapter and transformer unit. Note that the connection terminal is not IP20.

Operating Instructions

(3) Pilot Light 0.3 to 2 mm² (solid wire ø0.5 to 1.6 mm)

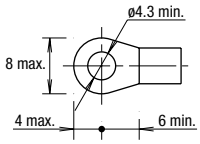
Applicable crimping terminal

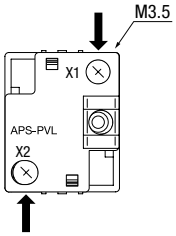
Be sure to use an insulation tube or cover on the crimping part of the crimping terminal to prevent electrical shocks.

<Full Voltage Type>

6V, 12V, 24V AC/DC

Terminal screws M3.5 (self-lifting)



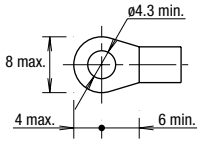


<Transformer Unit>

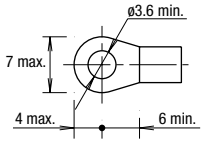
100/110V AC, 200/220V AC (240V AC maximum)

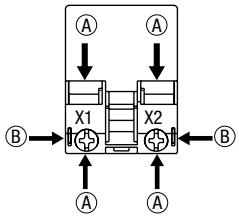
Terminal screws M3.5 (spring-up)

Crimping terminal for Ⓐ



Crimping terminal for Ⓑ

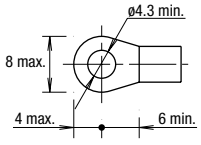


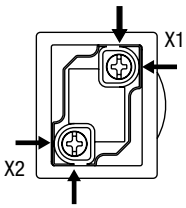


<DC-DC Converter Unit/Transformer Unit>

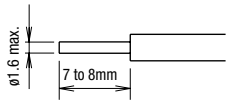
110V DC, 380V AC minimum

Terminal screws M3.5 (spring-up)





Solid wire



- Strip the wire insulation 7 to 8 mm from the end.
- Insert the wire until the insulation comes into contact with the terminal metal part.

- Install a terminal cover to 6, 12, 24V AC types. The connection terminal is not IP20.
- Terminal cover is integrated in the transformer and DC-DC converter unit. Note that the connection terminal is not IP20.
- When selecting mounting centers and crimping terminals, take sufficient insulation distance into consideration.

Cautions for Wiring

About using DC-DC Converter Unit

1. Note the polarity for wiring when connecting to the DC-DC converter.

Terminal No.	Polarity
X1	Positive
X2	Negative

2. Incandescent lamps cannot be used in DC-DC converter unit.
3. DC-DC converters are equipped with an electric circuit and noise may be heard inside the unit, which does not affect the performance of DC-DC converters.

Recommended Tightening Torque Number of Wires

Unit	Wire		Number of Wires	Recommended Tightening Torque	Terminal Screw
HW-U Contact Block	Crimping Terminal		2	1.0 to 1.3	M3.5
	Solid Wire	ø0.5 to 1.6 mm (AWG14 to 22)	2	1.0 to 1.3	
		ø1.7 to 2.0 mm (AWG12)	1	1.2 to 1.3	
	Stranded Wire	0.3 to 2.0 mm² (AWG14 to 22)	2	1.0 to 1.3	
		2.1 to 3.5 mm² (AWG12)	1	1.2 to 1.3

Ordering Terms and Conditions

Thank you for using IDEC Products.

By purchasing products listed in our catalogs, datasheets, and the like (hereinafter referred to as "Catalogs") you agree to be bound by these terms and conditions. Please read and agree to the terms and conditions before placing your order.

1. Notes on contents of Catalogs

(1) Rated values, performance values, and specification values of IDEC products listed in this Catalog are values acquired under respective conditions in independent testing, and do not guarantee values gained in combined conditions.
Also, durability varies depending on the usage environment and usage conditions.

(2) Reference data and reference values listed in Catalogs are for reference purposes only, and do not guarantee that the product will always operate appropriately in that range.

(3) The specifications / appearance and accessories of IDEC products listed in Catalogs are subject to change or termination of sales without notice, for improvement or other reasons.

(4) The content of Catalogs is subject to change without notice.

2. Note on applications

(1) If using IDEC products in combination with other products, confirm the applicable laws / regulations and standards.
Also, confirm that IDEC products are compatible with your systems, machines, devices, and the like by using under the actual conditions. IDEC shall bear no liability whatsoever regarding the compatibility with IDEC products.

(2) The usage examples and application examples listed in Catalogs are for reference purposes only. Therefore, when introducing a product, confirm the performance and safety of the instruments, devices, and the like before use. Furthermore, regarding these examples, IDEC does not grant license to use IDEC products to you, and IDEC offers no warranties regarding the ownership of intellectual property rights or non-infringement upon the intellectual property rights of third parties.

(3) When using IDEC products, be cautious when implementing the following.

i. Use of IDEC products with sufficient allowance for rating and performance

ii. Safety design, including redundant design and malfunction prevention design that prevents other danger and damage even in the event that an IDEC product fails

iii. Wiring and installation that ensures the IDEC product used in your system, machine, device, or the like can perform and function according to its specifications

(4) Continuing to use an IDEC product even after the performance has deteriorated can result in abnormal heat, smoke, fires, and the like due to insulation deterioration or the like. Perform periodic maintenance for IDEC products and the systems, machines, devices, and the like in which they are used.

(5) IDEC products are developed and manufactured as general-purpose products for general industrial products. They are not intended for use in the following applications, and in the event that you use an IDEC product for these applications, unless otherwise agreed upon between you and IDEC, IDEC shall provide no guarantees whatsoever regarding IDEC products.

i. Use in applications that require a high degree of safety, including nuclear power control equipment, transportation equipment (railroads / airplanes / ships / vehicles / vehicle instruments, etc.), equipment for use in outer space, elevating equipment, medical instruments, safety devices, or any other equipment, instruments, or the like that could endanger life or human health

ii. Use in applications that require a high degree of reliability, such as provision systems for gas / waterworks / electricity, etc., systems that operate continuously for 24 hours, and settlement systems

iii. Use in applications where the product may be handled or used deviating from the specifications or conditions / environment listed in the Catalogs, such as equipment used outdoors or applications in environments subject to chemical pollution or electromagnetic interference
If you would like to use IDEC products in the above applications, be sure to consult with an IDEC sales representative.

3. Inspections

We ask that you implement inspections for IDEC products you purchase without delay, as well as thoroughly keep in mind management/maintenance regarding handling of the product before and during the inspection.

4. Warranty

(1) Warranty period

The warranty period for IDEC products shall be one (1) year after purchase or delivery to the specified location. However, this shall not apply in cases where there is a different specification in the Catalogs or there is another agreement in place between you and IDEC.

(2) Warranty scope

Should a failure occur in an IDEC product during the above warranty period for reasons attributable to IDEC, then IDEC shall replace or repair that product, free of charge, at the purchase location / delivery location of the product, or an IDEC service base. However, failures caused by the following reasons shall be deemed outside the scope of this warranty.

i. The product was handled or used deviating from the conditions / environment listed in the Catalogs

ii. The failure was caused by reasons other than an IDEC product

iii. Modification or repair was performed by a party other than IDEC

iv. The failure was caused by a software program of a party other than IDEC

v. The product was used outside of its original purpose

vi. Replacement of maintenance parts, installation of accessories, or the like was not performed properly in accordance with the user's manual and Catalogs

vii. The failure could not have been predicted with the scientific and technical standards at the time when the product was shipped from IDEC

viii. The failure was due to other causes not attributable to IDEC (including cases of force majeure such as natural disasters and other disasters)

Furthermore, the warranty described here refers to a warranty on the IDEC product as a unit, and damages induced by the failure of an IDEC product are excluded from this warranty.

5. Limitation of liability

The warranty listed in this Agreement is the full and complete warranty for IDEC products, and IDEC shall bear no liability whatsoever regarding special damages, indirect damages, incidental damages, or passive damages that occurred due to an IDEC product.

6. Service scope

The prices of IDEC products do not include the cost of services, such as dispatching technicians. Therefore, separate fees are required in the following cases.

(1) Instructions for installation / adjustment and accompaniment at test operation (including creating application software and testing operation, etc.)

(2) Maintenance inspections, adjustments, and repairs

(3) Technical instructions and technical training

(4) Product tests or inspections specified by you

The above content assumes transactions and usage within your region. Please consult with an IDEC sales representative regarding transactions and usage outside of your region. Also, IDEC provides no guarantees whatsoever regarding IDEC products sold outside your region.
